# Pure price action trading by nikita pdf download pdf free version

Look at this candlestick pattern... Let me ask you... Who's in control? In fact, there are many variations that it's impossible to cover all in one blog post. Now... it's time to put these techniques into practice. This means when Support breaks it can become Resistance. It is always better to buy books in order to support the authors and publishers. Why you should buy from amazon? Here's an example: This is important because it lets you know whether the market is in an uptrend, downtrend, or range. Now, this isn't the Holy Grail. Here's what I mean: Make sense? Here are the things to look for: Occurs after the price have risen over the last 5 months or more (on Daily timeframe) It looks like a range market with obvious Support and Resistance areas — in an uptrend The 200-day Moving Average is flattening out The price whips back and forth around the 200-day Moving Average It looks something like this... At this point, the market is still in equilibrium with both buyers and sellers on equal footing. For example: The 20-period Moving Average can act as dynamic Support in strong trending market... Or the 50-period Moving Average can act as dynamic Resistance in a healthy trend... Pro Tip: Dynamic Support & Resistance can also be in the form of Trendline or Trend Channel. In a short time period, with a little bit of practice you will be able to interpret what price action is telling you without much effort. But, if you take a step back and look at the big picture, you'd realize the market tends to be in 1 of 4 stages... Accumulation Advancing Distribution Declining I'll explain... Stage #1: The Accumulation Stage The Accumulation stage occurs after a decline in price, and it looks like a range market in a downtrend. It covers concepts, ideas and price action trading methods that you most likely haven't seen anywhere else. Here's the deal: The markets are always changing (I'm sure you'd realize this by now). For example: Support and Resistance Respected Moving Average Trendline Next... #3: Entry trigger At this point: You know what to do (identify market structure) and where to enter (area of value). That's why I've written 2873 words in today's post, teaching you the secrets of Price Action Trading. What you want to do is compare the size of the current candle to the earlier candles. Where did the price close relative to the range? Next... To understand any candlestick patterns, you only need to know 2 things... Where did the price close relative to the range? For example: If the market is in an uptrend, you look to buy only. Reading, learning and applying the concepts and trading methods described will greatly improve your trading in all aspects, starting from analyzing the price movements on your charts to trade entry and exit. If the market is in a range, you can buy and sell. An example... Previous Support turns Resistance on (GBP/AUD): Previous Resistances turns Support on (NZD/USD): But why does it happen? Because when the price breaks Support, traders who are long are losing money and in the "red". Then let's get started... This is an extensive post and I would encourage you to download the PDF file below, so you can reference it in future. Because you also need to know where to enter your trade. And that's why when Support breaks it tends to become Resistance. The knowledge contained can be used to trade any financial market such as Forex, Futures, Stocks, Commodities and all major markets. You will be trading with an edge and with confidence. How to discover the footprint of the big financial institutions entering the market by doing exclusive price action analysis of the current trend to find supply and demand zones created by the traders with big volumes that move the markets. Working, highly profitable tested trading strategy that you can apply to the Forex market, and all the other major liquid markets where technical analysis can be applied. Rate this PDF [ Total: 41 | Average: 4.4 ] If you find this PDF violating your rights, and you want to unpublish it, Please Contact Us / DMCA. A candlestick pattern has 4 data points: Open - The opening price High - The highest price over a fixed time period Low - The lowest price over a fixed time period Close - The closing price Here's what I mean: For a Bullish candle, the open is always below the close. This question lets you know if there's any strength (or conviction) behind the move. Resistance - A horizontal area on your chart where you can expect sellers to push the price lower. Support - A horizontal area on your chart where you can expect buyers to push the price higher. Now the final part of the equation is to know when to enter. Should you buy, sell, or stay out? But there's still one part of the puzzle missing, and that's when to enter a trade. You will get familiar with concepts like value of price, control price, excess price, moving supply and demand levels. Next... 2. You'll need more "confirmation" to increase the odds of the trade working out and I'll cover that in details later. Let me explain... 1. Great! Now you have what it takes to read any candlestick pattern without memorizing a single one. Although it's a bullish candle the sellers are actually the ones in control. Because the price closed near the lows of the range and it shows you rejection of higher prices. An example... Does it make sense? and you notice that the price is also heading up to the fib level is 61.8 which coincides with the resistance level. Because you don't know what to do. It can in an uptrend, downtrend, range, low volatility, high volatility, etc. Here are a few examples... Support and Resistance on EUR/USD Daily: Support on (USD/CAD): Resistance on (GBP/JPY): Also: Support and Resistance can swap roles. The methods explained in the book will give you the edge you need in order to become consistently profitable while trading Forex, Futures, Stocks, Options, Commodities and all the liquid markets. Please feel free to download it on your computer/mobile. Why? An example of a Trending Move: #2: Retracement Move A Retracement Move is the "shorter" leg of the trend. It eventually gets "tired" and that's where it enters stage 3... Stage #3: The Distribution Stage The Distribution stage occurs after a rise in price, and it looks like a range market in an uptrend. What the heck is dynamic? Well, let's find out here in the following example... What if you were watching the market and then you saw that price is heading to a resistance level and then you checked your Fibonacci retracement and it's almost like a coincidence that the resistance level is also at 61.8 Fibonacci level as well. Unlike indicators, fundamentals, or algorithms... price action tells you what the market is doing — and not what you think it should do. This will change the way you see the market and the way you trade it. If all described above sound like hard work, do not worry. So ask yourself: "Is the market in an uptrend, downtrend, or range?" (In other words, identify the current stage of the market.) Once you can identify the market structure, then you'll know trade along the path of least resistance. You're probably wondering: "What is Price Action Trading?" Price action trading is a methodology that relies on historical prices (open, high, low, and close) to help you make better trading decisions. Where did the price close relative to the range? For example: If the market is in an uptrend, you look to buy only. Reading, learning and applying the concepts and trading methods described will greatly improve your trading in all aspects, starting from analyzing the price movements on your charts to trade entry and exit. If the market is in a range, you have a resistance level that price is coming to 3. So, what's next? This means you can look to short the breakdown of Support or wait for the breakdown to occur, then sell on the pullback. If the candles are large, it signals the counter-trend pressure is increasing. And that's not all because traders who missed the breakout will want to short the markets which increase the selling pressure. Next, you'll learn a few powerful candlestick patterns to help you better time your entries... Hammer Shooting Star Bullish Engulfing Pattern Bearish Engulfing Pattern I'll explain... Hammer A Hammer is a (1- candle) bullish reversal pattern that forms after a decline in price. Click on the link below and download The Ultimate Guide to Price Action Trading. Now, let's use this knowledge to find high probability trading setups — consistently and profitably. And when Resistance breaks it can become Support. Now once you understand the 4 stages of the market, then you'll know which Price Action Trading strategies to use in a given market condition — and you'll never be "lost" again. Now, look at this candlestick pattern... Who's in control? Let's dive in... What is a candlestick pattern and how does it work? And one last one... Bearish Engulfing Pattern A Bearish Engulfing Pattern is a (2-candle) bearish reversal candlestick pattern that forms after an advanced in price. Here's how to recognize it: The first candle has a bullish close The body of the second candle completely "covers" the body first candle (without taking into consideration the shadow) The second candle closes bearish And this is what a Bearish Engulfing Pattern means... On the first candle, the buyers are in control as they closed higher for the period On the second candle, strong selling pressure stepped in and closed below the previous candle's low — which tells you the sellers have won the battle for now In essence, a Bearish Engulfing Pattern tells you the sellers have overwhelmed the buyers and are now in control. Price Action Breakdown is a book on pure price action analysis of financial markets. This can be in the form of reversal price patterns like: Hammer Shooting Star Bullish Engulfing Pattern Bearish Engulfing pattern Let me share with you a few examples of The M.A.E Formula in action... GBP/USD Daily: Identify the market structure GBP/USD Daily: Wait for the price to reach an area of value GBP/USD Daily: Enter on a valid entry trigger Another example... T-Bond 4-hour: Identify the market structure T-Bond 4-hour: Wait for the price to approach an area of value T-Bond 4-hour: Enter on a valid entry trigger Can you see how everything fits together now? Here's what you'll discover... Are you ready? Moving on... Bullish Engulfing Pattern A Bullish Engulfing Pattern is a (2-candle) bullish reversal candlestick pattern that forms after a decline in price. Here's an example... And if there's no strength behind the move, the size of the current candle is about the same size as the earlier ones. Well, the price closed the near highs of the range which tells you the buyers are in control. Make sense? Here's how to recognize it: The first candle has a bearish close The body of the second candle completely "covers" the body first candle (without taking into consideration the shadow) The second candle closes bullish And this is what a Bullish Engulfing Pattern means... On the first candle, the sellers are in control as they closed lower for the period On the second candle, strong buying pressure stepped in and closed above the previous candle's high — which tells you the buyers have won the battle for now In essence, a Bullish Engulfing Pattern tells you the buyers have overwhelmed the sellers and are now in control. You know where to enter your trades (Support and Resistance) and what you should do in different market conditions (the 4 stages of the market). You've just learned what price action trading is all about, and how you can use it and to get a "feel" for the markets including price action trading with Forex. If you learn it well, it will improve your entries, exits and trade management. So, here are the guidelines I use... Zoom out your charts (at least 200 bars for me) Draw the most obvious levels (if you need to second guess, then it's not an important level) Adjust your levels to get the optimal number of "touches" (it can be body or wick) Now, if you want a full training on how to draw Support and Resistance, then check out this video below... Next... Dynamic Support & Resistance According to Classical Technical Analysis, Support and Resistance are horizontal areas on your chart. So you have 3 things lining up for you, here they are again: 1. the overall trend is down 2. Now you're probably wondering... "But how do I draw Support and Resistance on my charts?" That's a good question. So, that's where candlestick patterns come into play. And there's even more... the overall trend is also down. Now, just because you see a Hammer doesn't mean the trend will reverse immediately. Here are the things to look for: Occurs after the price breaks out of Support in a Distribution stage You see a series of lower highs and lows The price is below the 200-day Moving Average The 200-day Moving Average is starting to point lower An example... And if you have any trouble trying to identify the direction of the trend, then go watch this training... Now you might be thinking... "What's the point of learning the 4 stages of the market?" Here's the thing: If you can recognize the current stage of the market, then you can adopt the appropriate trading strategy to trade it. At this point: You've learned the essentials of Price Action Trading (Support & Resistance, Market Structure and Candlestick Patterns). This question lets you know who's in control momentarily. Here's how it works... Market structure Area of value Entry trigger I'll explain... #1: Market structure Now, I know it can be daunting to be looking at a blank chart. What I've described above is an example of confluence. So remember, if you want to know who's in control, ask yourself... Where did the price close relative to the range? This will, in turn, reveal the location of the value of price on your charts to provide valuable insights regarding extremely powerful support and resistance areas that you can take advantage of in real trading conditions. Proven price action concepts and techniques to find the market trend, thoroughly analyze its overall strength and make the most informed judgments possible about its termination. If the candles are small, it's a healthy pullback and the trend is likely to resume itself. It means Support and Resistance "move along" with the price instead of being static. However, the tide is turned if the price breaks below Support and that's where we enter the final stage... Stage #4: The Declining Stage The Declining Stage is a downtrend with a series of lower highs and lows. e-Books, Stock Market / Trading Books Summary Here on this page, we have provided the latest download link for The Ultimate Price Action Trading Guide PDF. But in strong trend markets, it won't work well and that's where you need to rely on dynamic Support and Resistance. It comes with an exclusive price action trading strategy that will add great value to your trading. The material is best suited for the analytical type of traders, who are willing to do the work in order to become a successful trader. This is useful when the market is in a range or weak trend. Or... If the market is in a Distribution stage, then you know there's a huge potential downside if the price breaks below Support. If the candles are large (in an uptrend), it signals strength as the buyers are in control. An example of a Retracement Move: #3: Swing Points Swing Points refer to swing highs and lows — obvious "points" on the chart where the price reverses from. The Ultimate Price Action Trading Guide / Chart - Book HOW TO TRADE CONFLUENCE WITH PRICE ACTION What is confluence? The power of this type of trading is that it is based on the underlying supply and demand dynamics, behind the price movements. What's the size of the pattern relative to the other candlestick patterns? For further reference, you can go to indiandpdf. And lastly, a Hammer is usually a Bullish Engulfing Pattern on the lower timeframe because of the way candlesticks are formed on multiple timeframes. Here's how to recognize it: Little to no upper shadow The price closes at the top ¼ of the range The lower shadow is about 2 or 3 times the length of the body And this is what a Hammer means... When the market opens, the sellers took control and pushed price lower At the selling climax, huge buying pressure stepped in and pushed price higher The buying pressure is so strong that it closed above the opening price In short, a hammer is a bullish reversal candlestick pattern that shows rejection of lower prices. If the candles are small, it signals weakness as the buyers are exhausted. Which one should I choose? Well, you want to trade from an area of value so you can buy low and sell high. Here's how... This is important, so pay attention... #1: Trending Move You're probably wondering: "What is a Trending Move?" A Trending Move is the "longer" leg of the trend. If the market is in a downtrend, you look to sell only. That's why the first thing to do is identify the market structure as it tells you what to do. Here are the things to look for: Occurs after the price breaks out of Resistance in an Accumulation stage You see a series of higher highs and lows The price is above the 200-day Moving Average The 200-day Moving Average is starting to point higher Here's what I mean... Now here's the thing... No market goes up forever. Now... What you've just learned are some of the most powerful reversal candlestick patterns. As a guideline: If the swing highs/lows move higher, then the market is in an uptrend If the swing highs/lows move lower, then the market is in a downtrend If the swing highs/lows are not moving higher or lower, then the market is in a range Now if you want to see the discover the secrets to chart patterns, then click here to find out. It is not suited for the type of trader looking to automate trading or relying on an indicator to make trading decisions. WHAT WILL YOU LEARN BY READING THIS BOOK ? How to find the bulk of trading volume by analyzing price action movements alone, without the use of additional tools or technical indicators. Now you're wondering: There are so many places to enter a trade. Introducing to you, The M.A.E Trading Formula, a proprietary trading technique I've developed to help traders get results, fast. A confluence is a point/level in the market where two or more levels intersect each other (or come together) and form a flashpoint or hot point or confluent point. But, they are not the only ones out there. Next... #2: Area of value Now, identifying the market structure alone isn't enough. These are just an intermediary that we interpret to find what we are really interested in: where are the buying and selling orders situated in the market. Perhaps the most important, you will learn a complete thought process that will make you a very versatile trader, able to adapt to the constantly changing market conditions. This means you can look to buy breakouts or pullbacks. At this point: You've learned the big picture of Price Action Trading. Personally, I like to enter when the market has shown signals of reversal — thus confirming my bias. Shooting Star A Shooting Star is a (1- candle) bearish reversal pattern that forms after an advanced in price. Here's how... If the market is in an Advancing stage, then you want to be a buyer (not a seller). And for a Bearish candle, the open is always above the close. But the good news is, you don't need to memorize candlestick patterns to understand what the market is telling you. Regardless of the time frame you use for trading or the market you are trading, the future price movements will start to trade at and around your predicted trading areas. If the current candle is much larger (like 2 times or more), it tells you there's strength behind the move. (The opposite of a Shooting Star is Hammer.) Here's how to recognize it: Little to no lower shadow The price closes at the bottom ¼ of the range The upper shadow is about 2 or 3 times the length of the body And this is what a Shooting Star means... When the market opens, the buyers took control and pushed price higher At the buying climax, huge selling pressure stepped in and pushed price lower The selling pressure is so strong that it closed below the opening price In short, a Shooting Star is a bearish reversal candlestick pattern that shows rejection of higher prices. Know more about our initiative Help us to serve you better. But, if you devote time to learning price action trading, you'll trade with cleaner charts, and can pinpoint your entries & exits with better precision. You'll get a beautiful PDF file that contains trading strategies and techniques I've shared with you (and additional content that I've no space to write here). Here are the things to look for: Occurs after the price have fallen over the last 5 months or more (on Daily timeframe) It looks like a range market with obvious Support and Resistance areas — in a downtrend The 200-day Moving Average is flattening out The price whips back and forth around the 200-day Moving Average Here's an example... Stage #2: The Advancing Stage The Advancing Stage is an uptrend with a series of higher highs and lows. First, let's define what's Support and Resistance so we're all on the same page. As the hard-working writer diligence should be paid off. The first step? It is based on trading the pure price action using key supply and demand levels. So, when the price rallies back to Support, this group of traders can now get out of their losing trade at breakeven — and that induce selling pressure. The price action analysis will allow you to see the big picture of the market at all times. You will learn how to use the value of price to find out very early when the trend will end and predict with high accuracy where the market will be heading next. You will be able to develop a clear market structure just by interpreting the price movements on your charts.
